Date Received: 05/20/2005

Item 1	Two (2) cartridge cases
Item 2	Four (4) cartridge cases
Item 3	One (1) bullet jacket

Evidence Submitted By: Shane J. Waite

Date Received: 11/03/2005

Item 4	One (1) lead core
--------	-------------------

#### RESULTS:

The item 1 cartridge cases, each a Remington brand caliber 9mm Luger cartridge case, were identified as having been fired in one (1) firearm and exhibit markings that may be suitable for identification with the firearm in which they were fired. An image of an item 1 cartridge case was entered into the NIBIN system. No associations were made at this time; however, searches will be conducted periodically as new images are entered into the database. Firearms that produce general class characteristics like those present on the item 1 cartridge cases include, but are not limited to, Glock brand pistols chambered to fire caliber 9mm Luger cartridges.

The item 2 cartridge cases, each a Winchester brand caliber 380 Auto cartridge case, were identified as having been fired in one (1) firearm and exhibit markings that may be suitable for identification with the firearm in which they were fired. An image of one (1) of the item 2 cartridge cases was entered into the NIBIN system. No associations were made at this time; however, searches will be conducted periodically as new images are entered into the database.

Item 3, consistent with a Winchester brand caliber 380 Auto Silvertip hollow point bullet jacket, was fired from a firearm having a barrel rifled with six (6) lands and grooves inclined to the right, and exhibits markings that may be suitable for identification with the firearm from which it was fired. Firearms that produce general class characteristics like those present on item 3 include, but are not limited to, pistols with the brand names Bersa, Erma, Auto Mag and Ordance Manufacturing chambered to fire caliber 380 Auto cartridges.

Item 4 lacks marks suitable for identification with any firearm.

The evidence is being retained for personal pickup.
